The objective of the sub-fund is to achieve medium to long-term growth by investing mainly in fixed income securities. The sub-fund will seek capital growth through investment in a diversified portfolio of bonds and money market instruments, listed on a regulated market, mainly denominated in USD, though it could be denominated in other currencies, including deposits of any credit institution without restriction to the maturity or any predetermination with regard to the location of the issuer.

sified portfolio with a limit risk exposure.

On an ancillary basis, the sub-fund may also invest up to one-third of its total net assets through investment funds in equities.

The sub-fund may only use listed futures for hedging purpose.

The currency of the sub-fund is expressed in USD.

## Risk and reward profile

### What does this synthetic indicator mean?

- The calculation of the risk indicator is based on historical data which may not be a reliable indication of the future risk profile of the sub-fund.
- The risk category shown is not guaranteed to remain unchanged. The sub-fund's risk indicator may shift over time.
- The lowest category does not mean a risk-free investment.
- The sub-fund VALLBANC INVESTMENT FUND - Balanced Fund is classified in category 3 as its investments are mainly in fixed income securities.
- Your initial investment does not benefit from any guarantee or protection.

### The risk and reward indicator does not take into account the following:

- The value of debt securities may change significantly depending on economic and interest rate conditions as well as the credit worthiness of the issuer. These risks are typically increased for below investment grade debt securities, which may

also be subject to higher volatility and lower liquidity than investment grade debt securities.

- The value of equity securities may go down as well as up in response to the performance of individual companies and general market conditions.
- The investment in underlying funds implies that the sub-fund is exposed to 1) the investment risks borne by the underlying funds, 2) the risk of increases in the level of charges borne by the underlying funds and 3) the risk that the underlying funds limit or suspend the right for their investors to redeem.
- Movements in currency exchange rates can adversely affect the return of your investment. The currency hedging used to minimize the effect of currency fluctuations may not always be successful.
- Using derivatives can involve a higher level of risk. A small movement in the price of an underlying investment may result in a disproportionately large movement in the price of the derivative instrument.
- Failure or deficient processes, systems and controls, human error or catastrophic events may lead to important losses.

### Where to find out more about the risks of the sub-fund?

Full information on the risks applicable to the sub-fund is detailed in the prospectus.
